

Secure Smart Region Congress of the Hessian State Chancellery, Department of the Minister for Digital Strategy and Innovation

**December 2nd, 2021,
from 9.00 am to 1.00 pm**

Smart regions or cities offer new options for citizens, the economy, and the administration. But smart regions must be secure – because the participating municipalities or public service institutions especially are increasingly the focus of cyberattacks.

So how can decision-makers reconcile security and digitization when creating smart regions or cities? How can municipalities digitise quickly and effectively while maintaining a high level of cybersecurity? Which innovative solutions do start-ups and accelerators offer? And what can we learn from Israel here?

.....

The interactive congress offers an exciting and varied programme with keynotes, impulse lectures, workshops, application examples and a panel discussion.

The detailed programme and more information on the congress can be found on the [website](#).

Be there and join the discussion! Register via the following link:
